Discovery Integration

The screenshot shows the UK eLibrary search interface. The search query is "making real the dream of education". The results page displays 688,067 results. The first result is a peer-reviewed academic journal article titled "Making the Dream Real: Montana's Indian Education for All Initiative Thrives in a National Climate of Anti-Ethnic Studies" by Carjuzaa, Joanna; Baldwin, Anna E; Munson, Michael. The article is from the journal "Multicultural Perspectives" (2015). A red arrow points to the article title. Below the article, an "Access options" dropdown menu is open, showing options for "Online full text", "LibKey Instant PDF", and "View Complete Issue". A second red arrow points to the "LibKey Instant PDF" option. A third red arrow points to the "View Complete Issue" option. The text "for All Through Open Schooling and Open" is visible next to the article.

The screenshot shows the search results page for the same article on the Warsaw University of Medicine website. The article title is "Making the Dream Real: Montana's Indian Education for All Initiative Thrives in a National Climate of Anti-Ethnic Studies". The authors listed are Carjuzaa, Joanna; Baldwin, Anna E; Munson, Michael. The article is from "Multicultural perspectives" (Warsaw, N.J.), 2015-10, Vol.17 (4), p.198-206. A red arrow points to the article title. Below the article, there are options for "Download Article" and "View Issue Contents". A red arrow points to the "Download Article" option. The text "Dostępny pełny tekst" is visible next to the "Download Article" option. The page also shows a "Wyszukiwanie" (Search) bar and a "Zaloguj się" (Log in) button.

PubMed search results for 'Tuberculosis outbreak investigation using phylodynamic analysis'. The search results show the title, authors (Denise Kühnert, Mireia Coscolla, Daniela Brites, David Stück, John Metcalfe, Lukas Fenner, Sebastien Gagneux and Tanja Stadler), and the journal (Epidemiology, 2018). The abstract is partially visible, discussing the fast evolution of pathogenic viruses and the development of phylodynamic approaches.

Full Text Finder Results for 'Tuberculosis outbreak investigation using phylodynamic analysis'. The interface shows the article title, authors, and journal information. It provides several options to access the full text, including links to the publisher's site, Elsevier, and ScienceDirect. A red arrow points from the PubMed citation to this interface.

Elsevier publisher page for 'Tuberculosis outbreak investigation using phylodynamic analysis'. The page displays the article title, authors, and journal information. It includes a 'Highlights' section with key findings: 'Phylodynamic analysis gives insight into mycobacterium tuberculosis outbreaks.', 'Robust estimation of epidemiological parameters in Bern thanks to high sampling rate.', and 'Infectious period for WTK cases significantly longer than in Bernese outbreak.' A red arrow points from the Full Text Finder interface to this page.

ScienceDirect PDF viewer for 'Tuberculosis outbreak investigation using phylodynamic analysis'. The page shows the article title, authors, and journal information. It includes an 'ABSTRACT' section that begins with 'The fast evolution of pathogenic viruses has allowed for the development of phylodynamic approaches that extract information about the epidemiological characteristics of viral genomes.' A red arrow points from the Elsevier publisher page to this PDF viewer.

LibKey link resolver interface. The interface shows the article title and authors. It provides options to view the article in context, including PDF and web link options. A blue arrow points from the Elsevier publisher page to this interface.

Making Real the Dream of Education for All Through Open Schooling and Open Universities in Ghana

Michael A. Tagoe¹

Abstract
Although the last three decades have witnessed astronomical increases in enrollment in basic education, the challenges of access, equity, and quality continue to confront countries, especially in sub-Saharan Africa. In Ghana, education sector policies and reforms have been unable to deal with low transition rates from primary to junior high schools, from junior high schools to senior high schools, and from senior high schools to tertiary level. Children and young students who are unable to continue fail to reenter because of the absence of complementary or alternative pathways. The old paradigm of physical expansion continues to dominate policies of access. Although several developed and developing countries have used open schooling and open universities to widen access, the success of these programs has been found on strong policies, commitment of government, and huge investment in technology. Indeed, the future lies with open schooling and open universities.

Keywords
Education for All, open schooling, open universities, out-of-school youth, education reforms

Introduction
The Education for All (EFA) world initiative launched in 1990 (Jomtien, Thailand) and ratified in 2000 (Dakar, Senegal; Torres, 2011; United Nations Educational, Scientific and Cultural Organization [UNESCO], 2000), and the Millennium Development Goals (MDGs; especially those on education) underscore the critical role that education plays in developing the knowledge and skills of people for a socially progressive society and a vibrant knowledge-based economy (Council of Ministers of Education, 2012). No country can improve the quality of life of its people without investment in human capital. Investment in human capital has been found to “foster growth through technological creation, invention and innovation as well as facilitating the uptake and initiation of new technologies” (Orley, Le, & Gibson, 2008, p. 284).
In developing the knowledge and skills of a country’s workforce for the future, children, youth, and adults must be seen as valuable assets. This means that countries need to

issues of access, low quality of education, and high cost of education (Daniel, 2012).
In Ghana, only 60% of junior high school (JHS) leavers could enter senior high school (SHS) in 2014 (Republic of Ghana, 2014) because of inadequate places, poor performance in the basic Education Certificate Examination, and the criterion for selection of pupils into secondary schools in Ghana (Ministry of Education, 2013). At the university level, of the 111,140 students who qualified into the nine public universities in 2012/2013, only 66,589 could be offered admission into these public universities (National Council for Tertiary Education [NCTE], 2014). Although private universities in Ghana absorb some of these students, regular intake into public universities is still woefully inadequate in relation to the contributions of university education to national development. A more worrying phenomenon is the growing limited opportunities for out-of-school youth, and workers who face keen competition from the large cohort of new secondary school graduates competing for the limited spaces in the universities.

Retraction integration

The screenshot shows a search results page on the 'explaW' library system. The search query is 'Effects of Transcranial Direct Current Stimulation over Left Dorsolateral pFC on the Attentional Blink Depend on Individual Baseline Performance'. The results list an article from the Journal of Cognitive Neuroscience (JoCN) with a red 'Retracted Article' icon. A red arrow points from this icon to the right-hand side of the image.

The screenshot shows the retraction details page for the article. It features a white background with the logos of 'UNIWERSYTET JAGIELLOŃSKI W KRAKOWIE' and 'BIBLIOTEKA JAGIELLOŃSKA'. A large red 'Retracted' stamp is overlaid on the top right. The page includes sections for 'Retraction Details (Learn More):', 'Full Text Format Options:', and 'Discover More:'. A red arrow points from the search results page to this page.

Second order retraction integration

The screenshot shows the library's search results page. At the top, there is a navigation bar with the library's name and various service links. Below it is a search bar containing the query 'Benefits of the Mediterranean Diet: Insights From the PREDIMED Study'. A sidebar on the left offers filters for document type, language, and publication date. The main content area displays a list of search results. The top result is the target article, which has been marked with a red 'X' over its title. Below the article title, there is a 'Czasopismo recenzowane' (Reviewed Journal) label. A red arrow points from this label to the right-hand side of the image.

This screenshot shows the LibKey integration interface. It features the library's logo and the text 'ACCESS PROVIDED BY'. Below this, there is a red link that says 'Not your organization?'. The main part of the interface is a dark blue sidebar containing a list of retracted citations. The first citation is 'REDUCTION IN THE INCIDENCE OF TYPE 2 DIABETES WITH THE MEDITERRANEAN DIET'. Below this, there are sections for 'Full Text Format Options' (with an 'ARTICLE LINK' button) and 'Discover More' (with a 'VIEW ARTICLE IN CONTEXT' button). A red arrow from the left points to the 'Czasopismo recenzowane' label in the previous screenshot.

<https://doi.org/10.1016/j.acalib.2017.02.016> 

Abstract

This study investigates two questions key to academic library resources and services: Which sources are students most likely to use to begin their academic work? Whom do students tend to consult for research assistance? In-depth interviews conducted with 15 undergraduate and graduate students were thematically analyzed through a three-step process. The findings indicate that students are most likely to consult faculty and peers for assistance and are largely unaware of librarians' roles, while they tend to begin research using library databases and do not necessarily start with Google. In addition, student use of small study groups as learning networks and reliance upon alternate sites to conduct research emerged as unanticipated themes.
